

Temporary Closure of Indoor Carpark

The Club has temporary closed the indoor carpark and converted it to a Regional Screening Centre in support of the national initiative by Health Promotion Board (HPB) for testing of workers in selected sectors.

The screening site is segregated away from the other parts of the Clubhouse. The Club has also put in place additional measures for the safety of members and guests. Visitors who are going to the screening site will use a dedicated access and exit gate, away from the main entrance via the side gate near the Pulau Ubin Ferry Terminal. Visitors to the screening site will also have their movements restricted to the indoor carpark. Additional manpower is deployed to guide these visitors, and to control the access so that members and guests will not enter the screening site.

The Club has consulted with HPB on the additional measures, and they have given the assurance that members and guests will be safe and can continue to use the facilities.
